## **Tutoring Module N. 6**

“ Regulatory review and oversight of NPP during operation”

November 26, 2012 – January 25, 2013

**c/o SNSA Ljubljana**

The tutoring activity has been conceived as “on the job training” at SNSA in the area of regulatory licensing and oversight of NPP during operation.

It will contribute to a real and practical “build-up” of knowledge allowing a sustainable transfer of approaches and methods.

The tutoring will start from the last week of November 2012 up to January for two months

Objective of the tutoring will be to ensure an optimum of transfer of know-how and develop capability to use it in the context of NRAs functions, complementing the acquisition gained in the previous 1 week training course on “Design safety and safety evaluation of NPP SAR”

The tutoring will include:

- On the job training at NRA in the area of regulatory oversight of operation of a NPP
- Regulatory management and licensing of plant safety related modification
- Participation to regulatory-operator meeting to get evidence of the roles, approaches and needed dialog
- Participation to onsite inspections to get evidence of the complementarity between safety review and regulatory inspections.
- Analysis of operational experience.
- Regulatory management of periodic safety review
- Familiarization with action plan as defined after the EC stress test
- Familiarization with regulatory requirements and applicable standards.
